

Review: Cruisin' on Land: A Sailor Discovers the RV World

by Jaimie Hall Bruzenak

Cruisin' on Land is quite an interesting read. Authors George and Gail are sailors so are used to traveling in a small space. Making the transition to RVing was fairly easy. In this book, they share their earned knowledge and experience.

For someone considering this lifestyle, this down-to-earth account is helpful in choosing a rig and seeing what day-to-day travel is like. They cover topics like:

- Choosing a rig
- Preparing for the cruise: the mechanical side
- Provisioning and outfitting for the cruise
- Driving an RV
- A day on the road
- Traveling with pets

Of interest to anyone thinking of traveling to Mexico are two chapters detailing their two-month trip to Puerto Penasco (Rocky Point), Mexico.

I recommend *Cruisin' on Land* as an addition to your reading if you are exploring the RV lifestyle. This non-technical read is aimed at those who want to enjoy RV travel but not necessarily become full-time RVers.

You'll find a lot of practical considerations and enjoy their folksy style. Click here to read more and purchase at Amazon.com:
